

# V-Care

The V-Care line is the expression of a human-centric approach to design. Created to foster user comfort, it combines progressive design and hygienic qualities.

KUSCH+CO

# **“Quality is irreplaceable”**

– Ernst Kusch

To us, quality is the concept that translates not only into our products, their design, materials and precision we proceed with, but also into our approach. It's our motivation that propels us to constantly explore customer's needs and address them through our solutions. As a man is in the centre of our interest, we don't want to offer him just the products – we want to give him the quality, that can truly improve his work, his everyday and the environment he lives in.

our expertise

For years Kusch+Co has been developing and manufacturing seating designed for the most demanding business sectors. Our products have been offering a healthy comfort, excellent aesthetics, and perfect functionality in hospitals, airports, residential care and nursing facilities. All of these much-frequented spaces are subject to stringent preventive building measures and need to be furnished with technically advanced series that provide efficient and practical solutions targeted at specific problems.

As the world has undergone major changes over the last few years, and we always strive to do better and voluntarily raise the bar, we want to transpose those solutions originally created for highly demanding sectors to the office environments. The result is V-Care, an exceptional, hygiene-safe chairs and benches series that outperforms the requirements of the normative standards.

CARE

because we care

design by

# Justus Kolberg

After completing his studies as an industrial designer at the Muthesius College in Kiel, he moved to Italy where he worked for a number of international companies. He rapidly established himself as a well-respected designer and returned to Germany in 1992 to develop several best-selling conference and seating series. In 1997, Justus Kolberg started freelancing from his new home base in Hamburg. His success is based on his genuine interest and curiosity for modern technical architecture – he has successfully integrated some of these concepts into his work for Kusch+Co.

“With sensitive  
intelligence  
to innovate  
simplicity.”

*OF DESIGN*

“The starting point and central element of V-Care is the shell. It should not only be comfortable and look comfortable but also create a positive and friendly atmosphere. The shell looks like it was formed by nature. It has something exhilarating and, despite its material strength, has something fine and light.”

The seat shell  
bevelled edges  
reflect the light,  
accentuating its  
slender shape.

The V-Care series includes both chairs and benches. The consistent seat shell design unifies the collection, providing a cohesive aesthetic across various settings.

# Awards

The Red Dot Design Award 2022 for the sled-base model says it all about the exceptional design quality of the V-Care series. In the hands of interior designers, this chair is a highly effective design tool for creating spaces. In all those places where people expect enhanced sitting opportunities every day.

20

The German Design Award 2023 is another very important award that confirms the uniqueness of the entire V-Care series.

we care about

*YOUR  
COMFORT*

V-Care is made of polyurethane which absorbs body temperature, boosting the seating comfort. Additionally, the unique structure of the surface prevents from slipping down from the seat.

# Enhanced seating comfort

KUSCH+CO

The slightly curved, ergonomically pronounced seat shell seems to wrap itself around the body of its occupant, while the fabric-like structure of the surface adds a haptically soft touch to the seating experience.

*YOUR*  
*SAFETY*

# dentist

*[den(tist) + noun]*

---

Someone who knows the drill, gets to the root of the problem  
and always seeks the tooth.

# Hygiene-safety

V-Care was born with hygiene DNA.

The seat shell has a unique anti-bacterial PU surface with silver ions, which reduces the growth of bacteria. It is not only easy to clean, but also safe to disinfect.

Its surface is resistant to a variety of cleaning and disinfecting substances. Will not be damaged or discoloured. Particularly now, following the pandemic-dominated years, this is not only immensely important in terms of functionality, but psychologically speaking, also accommodates people's heightened hygiene awareness.

Particularly stringent hygiene safety requirements apply in hospitals, doctors' surgeries, retirement and nursing homes. The V-Care excels in meeting these requirements.

# Inclusive design

34

Designed for people with reduced mobility, the model is available as a four-leg version with a seat height of 46, 51, or 56 cm. Another safety bonus is provided by the chair legs, which do not protrude past the edge of the seat, which could cause somebody to trip. You will also appreciate a load-bearing capacity of up to 150 kg body weight.

Reinforced armrests even enable the chair to be lifted and moved while somebody's sitting in it. The cut-out in the backrest makes it easier to grasp and move the chair, and the inclination of the backrest helps the occupant to stand up.

**kuschmed**<sup>®</sup>  
HYGIENIC-LINE

V-Care chair on 4 metal legs with or without armrests meets the demands of kuschmed<sup>®</sup> Hygienic-Line.

An expression of inclusive design is thinking about people with reduced mobility in any space, including public spaces, such as airport terminals, railway stations or hospitals.

The result is the design of the V-Care bench in the PRM version. These models provide the option of ordering raised seat shell in different configurations, depending on the number of seats in the bench.

*YOUR  
TRAVEL  
PERIENCE*

# V-Care benches ideal for travel environments

Worldwide, more than 260 international airports have furnished their environments with our waiting benches, seat islands or lounge furniture. These products are specifically designed for the waiting areas in airports, tried-and-tested in cruise terminals as well as bus and railway stations.

V-Care benches are perfectly suited to the travel environments. Not only does it meet the high requirements regarding safety, functionality, design, comfort and utility. Thanks to the antibacterial surface – both easy to clean and allowing a safe disinfection – V-Care offers an improved hygienic safety. Added to this are the Fire Prevention Concept, as well as the solutions for people with reduced mobility.

The product range offers both design flexibility and effortless rearrangement, featuring a diverse array of models tailored to fit any space at airports.

Each of the above models is available in a PRM version. The PRM versions feature a raised seat height. Details of each seat configuration can be found in the price list.

### **1. Armrests**

Available as internal and external armrests, importantly without pads.

### **2. Glides**

Various glides options, including different types of ground-mounted glides.

### **3. Media**

Two types of media ports are available: 1 and 2 modules. The V-Care bench can also have a cable outlet, either on the right or left.

### **4. Tables**

Available as internal and external tables, the latter in right and left versions and in two sizes.

The above configuration options also apply to the PRM models of the V-Care bench.

Modern design with its minimalist contours on the one hand and commodious comfort with more than just a hint of cosiness on the other are usually implacable rivals. What initially seemed irreconcilable has now been actioned so remarkably in V-Care series.

The result is a product that focuses on its users – whenever enhanced sitting is what matters. A series that combines contemporary use of materials, modern design, and outstanding comfort.
