QUALITY MEETS DESIGN

SPACE FLIP TABLE

Design: Andersen Design Team

SPACE FLIP TABLE

Space Flip is an intelligent addition to the Space table collection from Andersen Furniture. The Space series is designed with a focus on functionality and includes meeting tables in various heights, widths, and shapes. Space is characterized by its distinctive wooden frame, which offers endless possibilities and is well suited for use in offices or other public spaces, meeting the demands of today's workplace.

The series provides flexible and functional solutions while delivering the durability and strength expected from meeting tables in rapidly changing environments.

The Space Flip Table is designed for easy handling with user-friendly handles and locking mechanisms that make it simple to adjust, fold, and store the table. When the tabletop is flipped down, the space requirement is significantly reduced, making the table both practical and dynamic in use.

The table is mounted on casters for easy mobility and can be integrated with cable covers – ideal for educational settings, meetings, and conferences.

Space Flip Table is equipped with brakes on all four wheels.

Additionally, the Space Flip Table is available with linking brackets to ensure stability when multiple tables are connected.

PRODUCT HIGHLIGHTS

- Tabletop available in a variety of materials and colors
- Simple, Scandinavian design and aesthetic
- Option for integrated cable covers and power solutions
- Designed with easy-to-use handles and locking mechanisms
- Option for practical storage
- Mounted on casters for dynamic use
